First 100 Days: Rules, Regulations, and Executive Orders to Examine, Revoke, and Issue

A primer of the state of Federal Regulations and what should be addressed by Congress in the First 100 Days of the New Administration

EXECUTIVE SUMMARY

by Congressman Mark Meadows

This report was compiled to show the size and scope of the current regulatory state, and its impact on the nation's economy, jobs, small businesses, and the American people.

The regulatory rollback being laid out here serves as both a wakeup call to Congress and a warning to the American people: with each passing Administration, slowly but surely, we are seeing our Liberty being regulated away. The numbers speak for themselves. In this last Administration alone, there were close to 4,000 finalized regulations, costing an estimated \$980 billion, and adding thousands of paperwork hours to private businesses, States, and the Federal Government.¹

These rules hurt hardworking Americans by rigging the system to benefit connected insiders, limiting the ability of small businesses to provide opportunities for people to flourish, driving higher costs and limiting options in the marketplace.

Many of the rules listed here are subject to Congressional Resolutions of Disapproval under the Congressional Review Act, "a parliamentary mechanism that enables the new Congress and the new President to overturn agency final rules...issued after June 2016".² Many others, the new President can do away with on day one because they are guidance documents, proclamations, executive orders, or memoranda.³

This list could, frankly, be considerably longer—in fact, it could be much closer to the final tally of the Federal Register from last congress which stood at approximately 96,994 pages.⁴ With a rising national debt hitting \$19.5 trillion⁵ and counting, we've become a nation of regulations.⁶ If there was ever a time for reform to unleash the American economy, it would be now.

The Framers of the Constitution intended for three co-equal branches of government: Legislative, Executive, and Judicial. But, as Congress has abdicated its endowed power to legislate, tax, and spend, the Executive Branch has filled that void, aggressively superseding the role of Congress.

My hope is this report serves as the first of many necessary steps that will need to be taken to fix Washington, restore freedom, and unleash job creators. Starting here, this Congress should reassert its legislative powers to reign in the unelected Executive Branch bureaucrats, and restore public trust in our nations governing institutions.

It is also important to thank everyone who took the time to read the report through its various stages and submitted their feedback. My main objective, setting out, was to ensure my office provided a conduit for people to submit their concerns or support of specific rules and regulations, helping us to better understand their impact.

298	Office of Management and Budget Implement an agency-wide blanket freeze on all pending federal rules and regulations until approved by Trump-appointed agency or department heads. Direct department heads: (1) not to send any proposed or final regulations to the Federal Register without approval by a Trump-appointed department or agency head; (2) to withdraw any regulations already submitted to the Federal Register, but not yet published, until approved by a Trump appointee; and, (3) for final rules already published in the Federal Register but that had not yet taken effect, to postpone the effective date for 60 days. OMB could allow exceptions for emergency or urgent situations relating to "critical health and safety functions," and it excluded regulations promulgated pursuant to statutory or judicial deadlines.						●
